Later-

Thank you for your letter. It showed me how very cloudy I left the details of the steps. Strychnin made it part of the Library Talk. The chapel is being thought of in location of most popular library. The chapel will undoubtedly (when built) have a dome, probably like the ending of a half-pipe, only immensely larger. The Patterson over the steps can now be made into a shelter, oval roof supported by columns as indicated.
Your letter called my attention to the need of getting my history Poly to Red Cross at earliest date possible. I have cancelled my trip for the present to N.Y. and will bow my back to see if I can within a short time get the book out.

Thank you again for your letter that helped me & getting busy in my termination of Poly Hist.

J.Mill Harris
